

# COOLTONE® BY COOLSCULPTING®

Look and feel stronger.

*CoolTone is an FDA-cleared, noninvasive treatment that uses magnetic muscle stimulation to tone, firm, and strengthen muscles.*

## IS COOLTONE® RIGHT FOR ME?

CoolTone® uses Active Magnetic Pulse™ (AMP™) technology. Magnetic muscle stimulation is designed to induce powerful muscle contractions that the body could not otherwise do on its own.

- For most patients, 4 to 8 treatments are recommended over the course of 2 to 4 weeks to reach their body contouring goals
- Maintenance treatments are recommended. Talk to your provider to learn more
- Follow a balance diet and exercise routine to maintain treatment results

## WHAT IS A COOLTONE® PROCEDURE LIKE?

A treatment typically takes 20 to 30 minutes depending on the area being treated.

- During treatment, you will feel a series of involuntary (deep) muscle contractions over the targeted area that will last for a few seconds followed by a period of rest
- 
- You can continue to maintain your usual diet and exercise routine.
- Over the following weeks, you'll notice that treated areas will be more toned, firmer, and you will feel stronger.

*Muscles may atrophy or lose some of their strength and tone over time if they are not maintained through your usual exercise routine. You may return in a few months if your provider recommends maintenance, or to continue treatments of other areas you would like toned.*

## FDA CLEARED FOR 3 AREAS OF THE BODY

- CoolTone® causes involuntary contractions which strengthen the muscle fibers in the treated area, leading to a stronger, firmer, and more toned appearance. Treatment areas include the **abdomen, glutes, and thighs.**

*Call 253.284.9230 to schedule a consultation today in our Tacoma MedSpa to see if CoolTone® can help you achieve your body strengthening and contouring goals.*

*Thank  
you!*
